

# Insulated Blankets

## Product Information

Insulated blankets are designed to protect backflow assemblies from temporary freezing conditions, which occur during cold snaps and overnight freezing. For climates with extreme freezing temperatures, especially for a long duration, we suggest a solid structure with a heating element.

Insulated blankets are available in Forest green color. This color has been chosen to trap the heat during the day to protect the backflow Assembly through the freezing night.

R-13 value applies to the walls of a properly installed blanket. Due to the opening at the bottom of the blanket, conductive heat loss can occur. The blanket will provide a weather resistive barrier that increases the time before freezing can occur.

## Product Specifications

- 11oz. Acrylic coated polyester - Aqualon - 5 year limited warranty
- Color: Forest green
- Insulated with Bonded Dacron Fiber
- #2 Brass Spur Grommet (Fastens across the bottom with grommets using zip ties or locking device for security)
- #138 Black bonded dacron thread
- 18oz Black vinyl (Lining for durability)
- 2" Black velcro (Large blankets are fastened across the top with velcro & grommets)

## Models

SBC6A  
SBC04  
SBC05

## Dimensions

24" H X 24" L  
20" H X 34" L  
22" H X 40" L
