

10-2000SS-TOOL

Ames / Watts Check Disc Replacement

Works On:

Ames Models:

8"-12" 2000SS & 3000SS

8"-10" 4000SS (CK2)

Watts Models:

8" - 12" 774 & 774DCDA

8"- 10" 994 (CK2)

Tool set includes:

Torsion spring handle

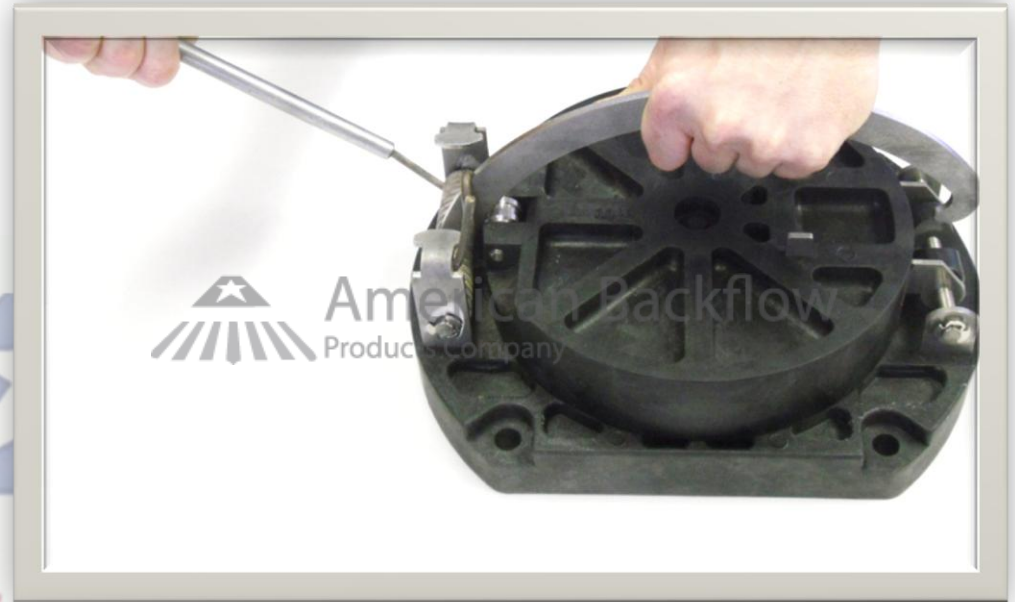

Retainer wrench

Using the torsion handle, place on the end of the torsion spring and move away from and around the retaining bracket.

Hold handle firmly, high spring tension.

This will free the cam arm and clapper.

Using the retainer wrench, unscrew the disc retainer counterclockwise.

Once the disc retainer has been removed, the check disc is free.
