230PF	30" (76.2 cm)	1-1/2" (3.8 cm)	6	10 GPM (37.9 L)	32" (81 cm)

### \*HOW TO SELECT A PUMP:

Most people prefer pumps with hoses attached.

Hose length determines the proper pump. It's the distance from the pumping site to the side of the boat.

The pump size depends on the amount of fluid to be pumped and the depth of the hull.
