DIMENSIONAL DATA

BUTT WELD ENDS

Steel (2 1/2" - 10" Zinc Plated)
Accuracy ±1%

SIZE	A	WEIGHT
2 1/2" - 746	3"	11 lbs
3" - 766	2 1/2"	12 lbs
4" - 744	2 1/2"	14 lbs
5" - 715	5"	15 lbs
6" - 743	6"	17 lbs
8" - 750	7"	20 lbs
10" - 755	8"	23 lbs
12" - 750	12"	62 lbs

BRASS THREADED ONLY

Accuracy ±1%

3 3/4" - 616	3 3/4"	13 lbs
4 1/4" - 685	4 1/4"	14 lbs

GROOVED ENDS

Steel (2 1/2" - 10" Zinc Plated)
Accuracy ±1%

SIZE	A	WEIGHT
2 1/2" - 746	4"	10 lbs
3" - 766	4 3/8"	13 lbs
4" - 744	3 3/4"	14 lbs
5" - 715	5"	15 lbs
6" - 743	6"	17 lbs
8" - 750	7"	20 lbs
10" - 755	8"	23 lbs
12" - 750	12"	62 lbs

FLANGED ENDS (RF)

Steel (2 1/2" - 10" Zinc Plated)
Accuracy ±1%

SIZE	150#	300#	WEIGHT
2 1/2" - 746	9 1/2"	10"	30 lbs
3" - 766	9"	10 1/4"	39 lbs
4" - 744	9 1/2"	10 3/4"	51 lbs
5" - 715	12"	13 1/4"	55 lbs
6" - 743	13"	14 1/4"	71 lbs
8" - 750	15"	16 1/4"	124 lbs
10" - 755	16"	17 3/4"	174 lbs
12" - 750	21"	22 3/4"	268 lbs

Fire Pump Test Meter Installation Instructions

Materials shipped will be as follows:

- One factory calibrated direct reading GPM meter with vent valves and clear hoses assembled and attached to the meter. The lens of the meter has an “FM Approved” sticker adhered to it with the Gerand model number, maximum rated PSI and serial number.
- One calibrated Gerand venturi with an attached metal tag listing the venturi size, the pump GPM, the meter range and the PSI rating. Adhered to the venturi is a “flow sticker” with an arrow showing the direction of flow and the suggested minimum straight upstream and downstream pipe diameters.
- One set of 500 PSI hoses with color code ends and brass fittings to connect meter to the venturi.
- One metal installation/operation tag permanently attached to meter via brass chain.

Installation Instructions:

- The venturi must be installed in line with the flow of the system going in the same direction as the arrow shown on the venturi. A minimum of (5 x Venturi Diameter) in straight pipe upstream and (2 x Venturi diameter) in straight pipe downstream. The straight pipe lengths must be the same diameter as the venturi.
For example: a 15.24 cm (6") Diameter Venturi requires 76.2 cm (30") of 15.24 cm (6") diameter straight pipe upstream and 30.48 cm (12") of 15.24 cm (6") diameter straight pipe downstream of the venturi.
- If the system has been piped with many elbows in the same or in different planes, we suggest longer straight runs upstream & downstream. These pipe diameters must be the same pipe size as the venturi.
- The meter is then attached via the screws to the welded bracket on the venturi.
- Once the meter is secured to the venturi, screw the ends of the hoses with no valves to the meter (red to red; green to green). Then, thread the valve ends of the hoses to the venturi (red to red; green to green).
