

WW105 & WW106

Wilkins 350 Check Removal Tool

WW106 Works On:

$\frac{3}{4}$ " 350

WW 105 Works On:

1" 350

Use:

Check module removal

Modules are located inside the vessel and are sealed by o-rings.

Both modules slide toward the outlet of the housing.

Place the vessel in the tool with the inlet side facing the push rod.

Rotate handle clock-wise until the modules are free.
